

Comment, Keywords and Identifiers

Q1. What is Dynamic typing and Static typing?
Q2. What is Dynamic Binding and static Binding?
Q3. Explain compilation and interpretation.
Q4.

Comments

In [2]: *# A good coder always explain thier code with comments.
Has(#) before a line, convert line into comment.*

```
'''using this type of  
comment for  
multiline comment'''
```

Out[2]: 'using this type of \n comment for \n multiline comment'

Keywords

Keywords is a reserve words that can use only for specific task.

and	A logical operator
as	To create an alias
assert	For debugging
break	To break out of a loop
class	To define a class
continue	To continue to the next iteration of a loop
def	To define a function
del	To delete an object
elif	Used in conditional statements, same as else if
else	Used in conditional statements
except	Used with exceptions, what to do when an exception occurs
False	Boolean value, result of comparison operations
finally	Used with exceptions, a block of code that will be executed no matter if there is an exception or not
for	To create a for loop
from	To import specific parts of a module
