Variables

Variable is a container

```python
x = 55
y = 44

# here x, and y called variable.
print(x+y)
```

99

```python
l = [1,2,3,'yuvraj',6.25, 'it could be anything']
t = ('even tuple values contain in a variable.')
d = {'name':'rahul','age':25,'weight':65}
```

```python
print(l) #l is a variable.
```

[1, 2, 3, 'yuvraj', 6.25, 'it could be anything']

```python
print(t) #t is a variable.
```

even tuple values contain in a variable.

```python
print(d) # Here d is a variable.
```

{'name': 'rahul', 'age': 25, 'weight': 65}

Thank you.
